

## **SE 59500 - Selected Topics in Systems Engineering**

### **Type of Course**

Elective for the Systems Engineering

### **Catalog Description**

Formal classroom or individualized instruction on topics of current interest. May be repeated for credit.

### **Credits**

Cr. 1-3.

### **Contact Hours**

Hours to be arranged

Prerequisite

Permission of Instructor

### **Course Outcome**

1. An ability to understand and apply advanced concepts in selected or emerging areas of systems engineering, and to integrate this knowledge in analyzing and addressing complex engineering problems.

### **Coordinator**

David Cochran, Ph.D.

### **Date**

9/2/2025
