

BUILDING AN ABSTRACT

THE FIRST sentence should restate the *purpose* of the experiment

THE SECOND sentence should restate your *hypothesis*

THE THIRD sentence should restate your *null hypothesis*

THE FOURTH-FIFTH sentences summarize the *procedure*, including how you established the control (this is NOT a list... use sentences)

THE SIXTH-EIGHTH sentences summarize the *data*, including the statistical analysis and error analysis (this is NOT data tables... use sentences to explain the findings)

THE NINTH-TENTH sentences summarize your *conclusion* being sure to mention whether the results supports the hypothesis or null hypothesis and reference your statistics here that support your conclusion.
